

FIRES AND BURNED-UP APPLIANCES from NON-UL-CERTIFIED "SMART" METERS: "We encountered an unusual number of fire incidents involving smart meters . . . prior to any proper investigation the utility company had removed and replaced the meters from the affected areas . . . New meters may have defects that cause electrical failures (or they may be caused by) careless installation during change over..." —Ontario Fire Marshal (Quoted by Scott Simpson, Vancouver Sun, August 7, 2012)

"Smart" Meter Radiation is a Serious Risk to Human Health

Cancer & RF Radiation. The World Health Organization (WHO) states that radio frequency (RF) electromagnetic fields (EMF) from non-ionizing radiation-emitting devices (such as "smart" meters, cell phones, and wi-fi) are a *Class 2B possible cancer causing agent* in the same category as lead, DDT, and chloroform. Documented EMF studies also show: DNA breaks, ADD/ADHD, endocrine disruption, heart arrhythmia, autism and more.

Some smart meters pulse RF radiation up to 190,000 times every day according to internal utility documents. *Children, pregnant women, seniors, those with immune deficiencies; medical conditions, pacemakers, and implants are especially at risk. Also animals and plants.*

Upon installation of smart meters, some people report headaches, ringing ears, dizziness, heart and breathing problems, insomnia, nausea, cognitive problems, memory loss, muscle spasms, rashes, and even seizures. Some have had to abandon their homes. *These symptoms only began after smart meters were installed. Electro-Hyper-Sensitivity (EHS) increases with exposure.*

Time bomb. Is there *scientific proof* that EMF are harmful? *The majority of studies—not industry-funded—say YES!* At first, the dangers of smoking and asbestos were ignored. Many illnesses, like cancer, take years to develop. **Are you willing to allow the utilities to put your family's health at risk?**

"Adverse neurological effects have been reported in people who sustain close proximity to wireless meters, especially under 10 feet," say 54 experts in 20 countries, including Joel Moskowitz of UC Berkeley School of Public Health and David Carpenter, Director, University of Albany Institute for Health and the Environment.

WHAT CAN WE DO? If you have an analog meter:

- Do not allow installers on your property. Call police if they trespass. Form a neighborhood watch.

- **Tell them "You are trespassing, Get off my property, I forbid installation of the new meter."**
- **Send a certified letter** to your utility refusing consent.
- **Secure analog meters** behind locked gates or lock box.
- **Don't agree to illegal "opt out" fees.** We never opted in!

If you have a "smart" meter:

- Revoke consent by certified letter with return receipt (samples at freedomtaker.com) and set a removal deadline.
- Insist that replacement meter(s) are **"purely electromechanical analogs with no electronic components."** Ask them to confirm it in writing.
- If your utility is refusing to remove an unwanted smart meter, people are buying analog meters online and having them installed. **It can be dangerous to remove a smart meter** if you don't know what you're doing. It is also dangerous to allow them to remain.
- If the utility cuts your service, be prepared to go to your city council, the community, and the media to report the bullying. **Forcing unwanted "smart" meters is illegal and must not be tolerated.**

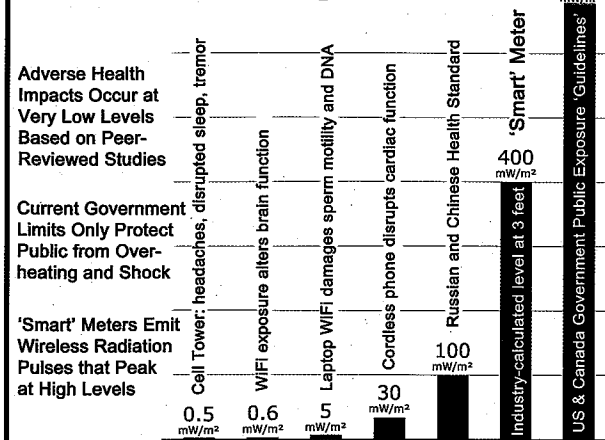

- Get it in Writing! In a dispute with a utility company, always keep copies of all correspondence. Avoid circular conversations with call center agents. Escalate to a supervisor. **Demand an analog for no charge and do not take no for an answer.** Address all letters to the CEO or General Manager. **Warning:** Whatever you say on the telephone to any utility employee is being recorded and may be used against you. Stick to a written script and factual info only.

- **Don't give up your power or your rights.** Assume the utility company is being deceptive.

Organize your community

- **Organize direct action** to protect your community.
- **Organize a screening** of the DVD documentary *Take Back Your Power* (www.TakeBackYourPower.net).

"Smart" Utility Meters

Are They Smart for You?

What are "Smart" Meters?

- Any **electronic utility meter**—usually wireless—that replaces analog electric, gas and water meters.
- They allow utilities, 3rd parties, and governments access to **precise information about your private life.**
- They **emit RF microwave radiation** and dirty electricity linked with health and environmental problems
- They can **catch fire** and damage appliances.
- They often **increase utility bills**

People around the world are rejecting "smart" meters and demanding a halt and a recall. Nevertheless, utility companies are spreading misleading information and continuing to force them on the public without a legal mandate.

VERIFY! Thousands of published and peer-reviewed scientific papers show environmental and human health damage from microwave radiation. To learn more and reduce your risk, go to: <http://stopsmartmeters.org/warning> DID YOU KNOW? THERE IS NO LAW FORCING US TO ACCEPT "SMART" METERS OR TO PAY "OPT-OUT" FEES.
